

EDIMAX

10/100Mbps USB to Ethernet Adapter

- *Easy to Install*
- *10/100Mbps Auto-Negotiation*
- *USB Interface*
- *Plug and Play*
- *Compact and Slim Design*

Now , connecting your personal computer (desktop PC or notebook PC) to the network is just a snap away with Edimax's USB 10/100Mbps Fast Ethernet adapter. This is designed for USB Compliant PCs. This adapter works with all PCs equipped with a USB port and Windows 98 operating system. You can connect to any 10Mbps, 100Mbps or 10/100Mbps hub without having to open your PC and install any internal cards.

Full/half duplex operation is auto-detected. In full-duplex, the PC is connected to a switch on a dedicated segment. With transmission and reception taking place simultaneously, data transfer is double.

Everything you need to get started is included in one box. The Edimax's USB 10/100Mbps network adapter comes complete with a USB cable, which plugs into the USB port of the PC ; and an RJ-45 socket to attach a standard UTP cable for a 10BaseT or 100BaseTX connection.

Simply plug in this adapter to your PC's USB port. And your PC will be up and running on the network. That's all you need to do. Not a tool is necessary, not a configuration setting is required. This simple installation backed up by high quality and low cost makes this 10/100Mbps adapter the most popular ones in the market.

FC CE

EDIMAX

10/100Mbps USB to Ethernet Adapter

Key Features

10/100Mbps Auto-Negotiation and Full-Duplex Support
