Chapter I: Familiar with your Internet Network Camera

1.1 Package Contents

Thank you for purchasing this Network Camera! Before you start to use this Network Camera, please check the package contents. If anything is missing, please contact the dealer of purchase and return the package to claim for missing contents.

	Item Name	Quantity
1	Network Camera	1
2	Antenna(wireless model only)	1
3	Power Adapter	1
4	Ethernet Cable	1
5	Driver and User Manual CD-ROM	1
6	Accessory kit	1
7	Quick Installation Guide	1

System Requirements

- Computer with Windows® 7, Vista or XP
- PC with dual core or above; at least 2GB RAM
- Internet Explorer 6.0 above
- Existing 10/100 Ethernet-based network or wireless 802.11b/g/n network(for wireless model only)

1.2 Basic Introduction

Thank you for purchasing this Network camera! This Network camera is an ideal product for all kinds of video surveillance purposes, like home/office safety, kid/pet monitoring, and remote video acquire etc. Edimax IC-3100 series is tailor made to stream live video over your network. You can view the Network camera's video from anywhere on your local computers or via the Internet. Besides, Edimax IC-3100 series features high quality and high frame rate video streaming through advanced video compression. In order to achieve the highest video quality, simply select H.264, MPEG4 or M-JPEG depending on your network settings.

You can discover more useful functions in next section!

- 1.3 Product Highlights
- No pre-loaded software required all you need is a browser like Internet Explorer 6 (and above, with plugin installed).
- With supplied video surveillance software, you can connect up to 16 video cameras and view images captured by every camera at the same time.
- Supports 3 video resolutions: MJPG and H.264 SXGA(1280 x 1024), VGA (640 x 480), and QVGA (320 x 240); MPEG4 XGA (1024 x 768), VGA (640 x 480), and QVGA (320 x 240).
- Anti-flicker function (eliminates flash caused by fluorescent lights, 50 / 60Hz selectable).
- Supports all major web browser, including Microsoft Internet Explorer,
 Apple Safari, Google Chrome, Firefox, and Opera*.
- Audio function, suitable for applications like video conference or environment monitor.
- Wired and wireless network (802.11b / 802.11g / 802.11n) support, supports up to 100Mbps for wired network and 100Mbps for wireless network.
- Wireless data encryption (WEP / WPA)
- Supports DHCP and PPPoE protocol, you can also assign a fixed IP address to the camera also.
- Supports Dynamic DNS (used to allocate the Network Camera's Internet address, when the ISP you're using does not assign you with a fixed Internet address).
- Supports UPnP, Windows XP (and above) will discover this Network
 Camera in network neighbor automatically.
- Send captured picture and video by Email or FTP when motion is detected.
- Configurable motion detection sensitivity (6 levels from most sensitive to least sensitive).
- Built-in real-time clock, date and time information will be recorded with every captured picture / video clip (also supports auto time synchronization via network time protocol).
- Upgradeable firmware.
- Supports up to 16 users, and you can set different password to different user.
- Usage and event logging.
 *Some functionality like 'fit to window' only works on Microsoft Internet Explorer.

1.4 Key Components

Front View

LAN LED: Indicates LAN activity

WLAN LED: Indicates Wireless LAN activity (only work on wired model

plugged with USB WiFi dongle and wireless model)

Power LED: Indicates power status

Focus Ring: Adjusts focus

Wired model

SD Card Slot: Accepts SD / SD-HC memory card for image / video storage USB Port: Connects to certain wireless module. Antenna Base: Connects to supplied antenna

WPS: click the button on IP Cam and click it on the AP you want to connect wireless connection.(works on wired model with USB wifi dongle plugged or wireless model)

Reset to Default Button: Press and hold for more than 10 seconds to reset the camera settings to factory default value.

Power Connector: Connects to 12V DC power adapter

Ethernet Connector: Connect to your local area network

Audio Connector: Connects to external speaker for audio output

Microphone: Built-in microphone for voice pick-up

Tripod Connector: Connects to any standard tripod / camera wall holder. MAC Address Label: Shows the MAC address of this Network Camera. Useful when you can't locate the camera on the network.

1.5 Descriptions for LED Indicators

LED Name	Status	Description
Power/Cloud Off Camera is no		Camera is not powered (camera off)
	On	Camera is correctly powered (camera on)
	Flash	The power LED will flash and light up
		when the camera is powered on and
		ready for access to Cloud.
LAN Off		LAN port not in use
	On	LAN port in use
	Flash	Transferring data via LAN port
WLAN	Off	Wireless LAN not in use
	On	Wireless LAN in use
	Flash at low	Waiting for WPS connection from AP and
	speed	flash speed is once a second.
	Flash	Transferring data via wireless LAN

1.6 Camera Installation

Please follow the following instructions to set your Network Camera up.

- 1. Unpack the product package and check if anything's missing.
- Connect the Ethernet cable to your local area network, and connect the other end to the LAN jack of this Network Camera.
 NOTE: You can skip this step if you plan to use wireless LAN only.
- 3. Plug the power adapter to wall socket, and connect the power connector to the power jack located at the bottom of the Network Camera.
- 4. Connect two antennas to the antenna bases, which is located at the back of this Network Camera.
- 5. Place the camera at a secure place, and point the camera to the place you wish to monitor. If you wish to hang the camera on the ceiling or wall, please use the tripod connector (located at the bottom of the camera) to secure the camera.
- 6. Launch Internet Explorer on your computer, and following the instructions given in next section to set the Network Camera.

1.7 Locate the IP Address of this Network Camera

Default IP address of this Network Camera is 192.168.2.3. If you wish to assign another IP address to this Network Camera, you have to log onto the web configuration interface of the camera first.

If the left three fields of the IP address of your computer is not 192.168.2, you'll have to change the IP address of your computer first:

1. Click 'Start' -> 'Control Panel'

2. Double-click 'Network Connections' icon.

3. Right-click 'Local Area Connection', and click 'Properties'.

4. Select 'Internet Protocol (TCP/IP)', then click 'Properties'.

🕹 Local Area Connection Properties 🛛 🔹 🛛 🛛
General Advanced
Connect using:
MD PCNET Family PCI Ethernet Ad Configure
This connection uses the following items:
☑ QoS Packet Scheduler ▲ ☑ Image: AEGIS Protocol (IEEE 802.1x) v3.5.3.0 Image: AEGIS Protocol (TCP/IP) ☑ Image: Internet Protocol (TCP/IP) Image: AEGIS Protocol (TCP/IP)
Install Uninstall Properties
Description Transmission Control Protocol/Internet Protocol. The default wide area network protocol that provides communication across diverse interconnected networks.
Show icon in notification area when connected Notify me when this connection has limited or no connectivity
OK Cancel

5. In 'IP address' field, please fill in any IP address begins with '192.168.2', and ends with a value greater than 2 and less than 254 (You can use the example in the picture '192.168.2.339'). In Subnet mask field, please fill '255.255.255.0'. Please keep all other fields empty, and click 'OK'.

Internet Protocol (TCP/IP) Proper	rties 🛛 🛛 🔀

You can get IP settings assigned autom this capability. Otherwise, you need to a the appropriate IP settings.	
Obtain an IP address automatically	,
• Use the following IP address:	**********
IP address:	192 . 168 . 2 . 239
Subnet mask:	255 . 255 . 255 . 0
Default gateway:	
Obtain DNS server address autom	atically
── Use the following DNS server add	resses:
Preferred DNS server:	
Alternate DNS server:	
	Advanced
	OK Cancel

If you changed the IP address of this Network Camera and you forget it, there're 2 methods to recover it:

- a. Press and hold the 'Reset' button located at the bottom of this Network Camera, to clear all settings of the Network Camera and reset the IP address back to 192.168.2.3. You'll lose all settings in the Network Camera.
- b. Ask network administrator to check the DHCP release table, if the camera was set to obtain the IP address by DHCP, a new record will be added to DHCP release table on DHCP server when the Network Camera is connected to the local area network.

1.8 Using the Camera Admin Software to Locate the Camera

If you can't connect to the camera by the instructions given in last chapter, you can use camera admin software to search the camera which is connected to your local area network. The admin software is also capable to locate multiple cameras on your local area network.

Please insert the user manual CD-ROM supplied in the product package, and the CD will automatically running the installation, if not please double-click 'EdiView Finder utility_v1.0.5' icon :'.

Then follow the following instructions to install and use camera admin software:

1. Double-click Ediview finder installer, and click 'Run' when you're prompted:

2. Ediview finder will list all Ediamx network cameras found on local network, with their IP address and MAC address:

You can click I icon to find network cameras on local network again, or

select an network camera and click See Icon to configure it (see next step).

To preview the image of network camera, please click the icon indicated by white arrow, and provide username / password, and a snapshot will be displayed.

This function is only available when this icon is displayed as blue color.

EDIM/	• x
(Camera Name : IC-BD3C08 Model : Edimax_IC7010PT IP Address : 192.168. 94.101 MAC Address : 00:1f:1f:bd:3c:08
	D 🖉 English 💌

3. Ediview finder will inspect network camera's connection type and if it's connected to Internet, this may take a few seconds, please be patient

4. This message will tell you if your network camera is connected to Internet (connected to the cloud), and the connection type (wired or wireless). When you see this message, click 'Next' to continue. If you don't want to change network camera's name and password, you can click 'X' on the upper-right corner of window to close ediview finder utility

5. You can input these information to configure network camera. Camera Name: Input network camera's name used to identify this network camera.
Password: Input new password
Confirm: Input new password again for confirmation
Click 'OK' button to keep changes

Camera Name	IC-BD3C08	
Password		
Confirm		() ()
	OK	

After the camera finder utility is launched, all cameras found on your local area network will be displayed. To preview the image of network camera, please click the icon indicated by white arrow, and provide username / password, and a snapshot will be displayed

This function is only available when this icon is displayed as blue color.

All camera-related information will be displayed here. If you wish to connect to certain camera by web browser, double-click the camera listed here.

The camera admin software also provides several functions:

Language change: This camera finder utility supports 3 languages: English, Chinese, and Simplified Chinese. You can select the language you wish to use from language dropdown menu located at upper-right corner of camera finder utility.

EDIM/	- ®	
@	Camera Name : IC-8D486C Model : Edimax_IC-7110P IP Address : 192.168. 4. 60 MAC Address : 00:1f:1f:bd:48:6c	
		•
	English	-

Search camera: Click this button to search all cameras on local area network again.

Configure camera: Click this button to configure camera's network and security setting. You'll be prompted to input camera's password:

Camera Name	IC-BD3C08	
Password	ļ î	
Confirm		ţ,
	OK	

Input the password (default: 1234) and click OK to configure the camera's network and security setting:

In 'Lan Setting' page, you can configure camera's network settings. Select 'DHCP' to set the camera to obtain an IP address from DHCP server on local area network automatically, and select 'Manual IP' to input the IP address information manually. Click 'OK' to save settings.

1.9 Logging in the Management Interface

Make sure the network camera is correctly powered (Power LED is on), and then launch Internet Explorer and type the IP address of the network camera in address bar of Internet Explorer. You should be prompted to input the user name and password:

Connect to 192.1	68.2.3
	GA
username and pa Warning: This ser password be sent	68.2.3 at Internet Camera requires a ssword. over is requesting that your username and t in an insecure manner (basic shout a secure connection).
<u>U</u> ser name:	🖸 admin 👻
Password:	••••
	Remember my password
	OK Cancel

Default user name is 'admin' and password is '1234'. Click 'OK' to continue after user name and password has entered.

If you're rejected, maybe the password has been modified previously. This should not happen if this is a newly-purchased camera, however, if you get the camera from someone else, the password would be changed. Please try to obtain the correct user name / password, or you'll have to reset the camera.

If this is the first time you log onto web management interface, you'll be prompted to install ActiveX Plugin:

Microso	ft Internet Explorer 🛛 🛛 🔀
♪	ActiveX plugin is NOT installed yet, please install activeX first.
	ок

When you see this message, please click 'OK', and click 'Download the latest ActiveX' link to download plugin so you can use this camera:

IE ActiveX plugin is NOT installed yet.		******
Please downlaod the latest ActiveX and	l close IE browser before you reinstall	it. <u>Downlaod the latest ActiveX</u>
Snapshot C:1	Recording C:1	· · · · · · · · · · · · · · · · · · ·
Digital Zoom	Fit to Window Size	Full Screen

Click 'Run' to download plugin:

File Dow	File Download - Security Warning 🛛 🛛 🔀		
Do you	u want to run or save this file?		
	Name: Setup_v1.0.0.3.exe Type: Application, 747 KB		
	From: 192.168.3.3 Run Save Cancel)	
While files from the Internet can be useful, this file type can potentially harm your computer. If you do not trust the source, do not run or save this software. What's the risk?		ıt	

Click 'Run' to install plugin:

Internet	Explorer - Security Warning	
The publisher could not be verified. Are you sure you want to run this software?		
Nar	me: Setup_v1.0.0.3.exe	
Publisher: Unknown Publisher		
	Run Dont Run	
	This file does not have a valid digital signature that verifies its publisher. You should only run software from publishers you trust. <u>How can I decide what software to run?</u>	

Please click 'Next' button to start installation (click 'Next' or 'Install' when you're prompted, until installation is complete).

Click 'Finish' to complete plugin installation.

Now you can go back to web browser, and you should be able to see the image captured by camera (You may need to press F5 or CTRL-R to reload web page).

Note: If you see one of these messages (or both):

		Error 🔀
Display hardware is not capable of blit operations	OR	Can't initialize DirectX.

Your computer may not have the display capability that this Network Camera requires, or you don't have Microsoft DirectX® installed. Please download Microsoft DirectX® from Microsoft's website (<u>http://www.microsoft.com</u>), and try again.

In some cases, your computer is able to display the image from Network Camera correctly, but you'll still see these messages. If this happens, just ignore them.

Chapter II: Using Web Management Interface

2.1 Camera Settings

The first menu after you logged onto web management interface is 'Camera', and this is the only menu you can see the real-time image from camera.

You can always back to this menu by clicking 'Camera' on the top of web management interface.

The descriptions of every setting in this menu will be given below:

Item	Description
Video Type	Specifies video encoding type. Available options
	are 'MPEG4', 'MJPEG', and 'H.264'. Different
	encoding type requires different bandwidth, and
	provides different video quality.
Frequency	If the place where this Network Camera points to
	has a (or more) fluorescent light(s), the image
	may look flashing. In this case, you can adjust
	this setting to the frequency of electrical power;
	this can improve the image quality effectively. If
	you don't know which one you should use, just try
	any of them and select one with less flicker.
Flip Mode	If you're not putting this camera on a horizontal
	surface but hang the camera on the ceiling or
	wall, you can use this function to rotate the
	displaying image.
Brightness /	Select brightness, saturation, and sharpness
Saturation /	from dropdown menu, and click '-' or '+ ' button
Sharpness	to increase or decrease brightness / saturation /
	sharpness setting value. In certain environment,
	adjust brightness, saturation, and / or sharpness
	will help improve video quality.
Volume	Adjust the volume of audio output. Press '+' or
	'-' button to increase or decrease volume.

NOTE: When you change any setting(s) listed above, please click 'Apply' button so the change(s) will take effect. For following functions, changes will take effect right away.

Snapshot	Click 'Snapshot' button to save the displaying image
Snapshot	as an image file, a message box will appear after
	you click 'Snapshot' button, showing the filename
	and location of saved image file (default filename is
	current date and time).
	Default directory used to save image file is 'C:\', you

	can change the directory by clicking the text input	
	box located at the right of 'Snapshot' button:	
	Snapshot C:1	
	and you'll be prompted to select a new directory.	
Recording	Press this button to record the displaying image as a	
Recording	video file in AVI format, and you can play the video	
	file back by Windows Media Player. To stop	
	recording, press 'Stop Recording' button (the same	
	button). You can also change the directory used to save video file.	
Speak to Network Cam	You can transmit the voice received by your	
	computer's microphone to the camera's external	
Speak to IPCam	speaker. Press and hold this button, then speak to	
	the microphone. Please note that external speaker	
	must be connected to this camera.	
Digital Zoom	If you wish to enlarge certain portion of the captured	
Digital Zoom	image, you can click this button to set digital zoom:	
	Digital Zoom	
	Enable Zoom Factors 253 % 100% 400%	
	Click 'Enable' to enable digital zoom function, then	
	you can drag the slide bar to adjust zoom ratio. You	
	can also use your mouse to drag the zoom area (the	
	green square) to reposition the zoom area.	
Fit to Window Size	Click this button and the image size will be adjusted	
Fit to Window Size	to fit the size of browser window.	
Full Screen	Click this button to display the image in full-screen	

Full Screen

mode (uses all available space to display the image captured by this camera).

*Please note: If you're not using Microsoft Internet Explorer as web browser, some functionalities may not work properly.

2.2 Video

You can change video-related settings of this Network Camera in 'Video' menu. You can access this menu by clicking 'Video' on the top of web management interface.

There are 5 types of video settings for this Network Camera. To set the option of a certain video setting, put mouse cursor on it and its options will appear.

Video				
MJPEG	MPEG4	H.264	OSD	
MJPEG	tona natol na tona n		oner natod när toner natod när	
Video Resolution :	640 x 480 🔻			
💘 Video Quality :	Highest 👻			
🛛 Frame Rate :	30 👻			
	Apply			

2.1.1 MJPEG

You can adjust video settings when you select 'MJPEG' as video type in 'Camera' menu.

MJPEG

- 💘 Video Resolution :
- 🛩 Video Quality :
- 🛛 Frame Rate :

640 x 480 🛛 🗸

The descriptions of every setting in this menu will be given below:

Item	Description
Video Resolution	Changes the resolution of video. Available options are 1280 x 1024, 640 x 480, and 320 x 240. Higher resolution provides better video quality and more detail, but requires more network bandwidth.
Video Quality	Changes video quality. There are 5 levels of video quality from 'Lowest' to 'Highest'. Selecting a higher video quality will provide better video quality, but requires more network bandwidth.
Frame Rate	Changes video frame rate. Available options from '30' to '1', indicates how many video frames this camera will transmit every second. Higher frame rate provides smooth video watching experience and will not lose details of video, but requires more network bandwidth. If you're using this video camera with insufficient network bandwidth, selecting a lower frame rate setting will help.

Click 'Apply' for settings to take effect.

2.1.2 MPEG4

You can adjust video settings when you select 'MPEG4' as video type in 'Camera' menu.

MPEG4

- ♥ Video Resolution : 640 × 480

(512<=MTU Value<=1492)

Item	Description
Network Type	This camera can obtain the IP address from DHCP
	server automatically (if you have one), or set a fixed IP
	address. Select 'DHCP' to obtain IP address
	automatically or 'Static IP Address' to assign this Network
	Camera with a fixed IP address.
	When 'DHCP' is selected, IP address parameters below
	will be grayed out.
IP Address	Specify the IP address for this Network Camera here.
Subnet Mask	Specify the subnet mask for this Network Camera here.
Gateway	Specify the gateway address of the local network here.
Primary DNS	Specify the IP address of DNS server here. Please input
	IP address only. If you don't know the address of DNS
	server, ask network administrator or your ISP for help.
Secondary DNS	Specify the IP address of backup DNS server here. When
	primary DNS is unreachable, Network Camera will use
	the IP address specified here as DNS server.
	This field is optional.
Web Port	Specify the port number of web management interface
	here. If it's not 80, you'll have to add ':port' after the IP
	address / hostname of this Network Camera.
	For example, if the HTTP port number you specified here
	is 90 and the IP address of Network Camera is
	10.20.20.30, then you have to input
	'http://10.20.20.30:90'
	in the address bar of Internet explorer.
Enable PPPoE	Select 'Enable' to activate PPPoE function of this
	Network Camera, select 'Disable' to disable it.
User Name	Input the PPPoE username assigned by your ISP here.
Password	Input the PPPoE password assigned by your ISP here.
MTU	Input the MTU (Maximum Transmission Unit) given by
	your ISP here. Ask your ISP if you don't know what value
	you should input here. Default value should work with

most of ISPs and will give you a nice network
performance.

Click 'Apply' to save settings and make the new settings take effect.

2.2.2 WLAN

🛚 Wireless	Connection	n:	🔘 Enable	💿 Disable

 SSID : Channel Wireless WPS Self PinC Configure 	Key : code :		1 V Apply	3C	•••••		

Item	Description
Wireless	Select 'Enable' to activate wireless network function of
Connection	this Network Camera, select 'Disable' to disable it.
Network Type	Select the network type of wireless connection.
	Available options are 'Infrastructure' (Connect the Network Camera to a wireless access point), and 'Adhoc' (This Network Camera will become a stand-alone wireless network point, other wireless computers / devices can discover this Network Camera and connect

	to it without wireless access point).
	You can set to 'Adhoc' when you don't have any wireless access point, but your computer has wireless network card. Set to 'Infrastructure' when you have wireless access point, and you have computers with wired network connection.
Available	Here shows all wireless access points found by this
Networks	Network Camera. Please note not all access points will be displayed at the same time, if the access point you expected to connect does not appear, you may have to click 'Refresh' button for several times until it appears.
	The descriptions of all fields is listed below:
	Connect: You can select the wireless access point you wish to connect here.
	SSID: the SSID of all found wireless access points will be shown here. Some wireless access point may hide their SSID; in this case, you have to identify them by their MAC address.
	MAC Address: If you there are many wireless access points in proximity or some wireless access point hides it's SSID, you can use MAC address to distinguish them. Signal: Shows the radio signal strength in percent. Channel: Shows the radio channel of this wireless access point.
	Encryption: Shows the encryption type used by this wireless access point. You must use the same encryption type if you wish to connect to a certain wireless access point. If the wireless access point does not use encryption, 'Disabled' will be displayed here.
	Network Type: Shows the network type of a certain wireless access point (Infrastructure or Adhoc).

SSID	Input the SSID of the wireless access point you wish to connect. It should be less than 32 alphanumerical characters. When you select a wireless access point above, it's SSID will be filled in this field automatically. However, if the SSID is not displayed (the wireless access point you selected choose to hide it's SSID), you have to know it's SSID and input it here, or you will not be able to connect
Channel	it. Select the radio channel you wish to use here. When network type is 'Infrastructure', the radio channel is auto-selected according to the channel that wireless access point uses. You can only select the channel number when network type is 'Adhoc'.
Wireless Key	Input the encryption key of selected wireless access point here. This is required when access point you wish to connect uses encryption.
Self PinCode	Here displays the WPS pin code used to connect to WPS-enabled wireless access points. You have to input this number into the WPS enabled access point to establish WPS connection.
Configure via Push Button	Click this button and this camera will enter PBC-style WPS connection state for 120 seconds. Please push 'Start PBC' button on the wireless access point you wish to connect within 120 seconds to establish WPS connection (The remaining time will be displayed on the button). If connection can not be established after 120 seconds, you'll be prompted by a message box, and you can press
Configure via PinCode	'Start PBC' button to try again.If you have wireless access point's WPS PIN code, you can input it here and press 'Start PIN' button to start to establish PIN-style WPS connection.

2.2.3 Dynamic DNS

If your ISP does not give you a fixed Internet IP address (i.e. the Internet address you're using when you access the Internet is not always the same – ask your ISP for detailed information), you can use this function to help you locate the IP address of this Network Camera when you're away from home or office.

Before you can use this function, you'll need to apply for an account at dyndns.org/ no-ip.com (<u>http://www.dyndns.org/</u> or <u>http://www.no-ip.com</u>). Detailed instructions of how to apply a new account can be found on dyndns.org's or no-ip.com website.

Dynamic DNS	
🛩 Enable DDNS :	🔿 Enable 💿 Disable
🛩 Provider :	dyndns.org 🔽
🛩 Host Name :	ddns-host
🛩 User Name :	ddns-account
🛩 Password :	•••••
	Apply

The descriptions of every setting in this menu will be given below:

Item	Description	
Enable DDNS	Select 'Enable' to activate Dynamic DNS function of this	
	Network Camera, select 'Disable' to disable it.	
Provider	Select dynamic DNS service provider here. Dyndns.org	
	or no-ip.com is available currently.	
Host Name	Input dynamic DNS host name here.	
User Name	Input dynamic DNS user name here, must be the same	
	as the one you applied on dyndns.org or no-ip.com.	
Password	Input dynamic DNS password here, must be the same as	
	the one you applied on dyndns.org or no-ip.com.	

Click 'Apply' to save settings and make the new settings take effect.

2.2.4 UPnP

When UPnP function is activated, all UPnP-compatible computers / network devices will be able to discover this Network Camera automatically (only those in the same local network).

This function is useful and you don't have to remember the IP address of this Network Camera. Simply open 'Network neighbor' and it's there!

UPnP	
👻 Enable UPnP :	🔿 Enable 💿 Disable
	Apply

The descriptions of every setting in this menu will be given below:

Item	Description	
Enable UPnP	Select 'Enable' to activate UPnP function of this Network	
	Camera, select 'Disable' to disable it.	

Click 'Apply' to save settings and make the new settings take effect.

After UPnP function is activated, a popup message will appear:

Click the message to open 'My Network Places', and you'll see the Network Camera:

You can double-click the icon to launch Internet Explorer and log onto Network Camera's web management interface directly.

2.2.5 LoginFree

This camera provides a method to let unauthorized users to view the image captured by this camera, which is called as 'LoginFree'. When you wish to let everyone to view the image captured by this camera, or integrate the image with your own web application, you can use this function:

LoginFree		
🛩 Filename :		gqi
	Apply	

Input the filename here, and click 'Apply' to save settings, then other users can access the image by this filename with .jpg extension with the camera's IP address as prefix. For example, if your camera's IP address is '192.168.2.1' and the filename you set here is 'picture', then everyone on the web can access the image captured by this camera by using the following address:

http://192.168.2.1/picture.jpg

Please note that no authentication will be required to see the captured image. If you wish to disable this function, clear the text in 'Filename' field and click 'Apply.

2.2.6 RTSP

If you want to watch video captured by this Network Camera by your own RTSP (Real Time Streaming Protocol) media player, you can use this function to setup RTSP parameters, so your RTSP-compatible player will be able to receive video data.

Video Streaming

🛛 RTSP Port :	554	
🛩 MPEG4 RTSP Path :	ipcam	.sdp
💘 H264 RTSP Path :	ipcam_h264	.sdp
💘 RTP Port Range :	50000 - 60000	
	Apply	

Item	Description	
RTSP Port	Input the port number of RTSP here. Default setting is	
	554.	
MPEG4 RTSP	Input the path of MPEG4 RTSP video file. When you use	
Path	RTSP-compatible media player to play RTSP stream,	
	please remember to add '.sdp' file extension.	
H.264 RTSP	Input the path of H.264 RTSP video file. When you use	
Path	RTSP-compatible media player to play RTSP stream,	
	please remember to add '.sdp' file extension.	

2.3 Motion Detection

When you wish to use this camera to monitor the activities, motion detection function will be very useful. Camera will detect the motion in captured image, and take a snapshot when motion is detected. So you can use this camera to keep the safety of the belongings you have.

To use motion detection, click the following link from the top of menu:

After you selected 'Motion Detection', a sub-menu will appear. There are 5 sub-menus available here:

Motion Detection	Motion Region	E-Mail	FTP Configuration	SD Card Configuration

Detailed descriptions of every setting will be given below.

2.3.1 Motion Detection

You can use this menu to setup basic motion detection settings:

Motion Detection			
Enable Motion Detection :	Motion Detection : 💿 Enable 🔘 Disable		
Motion Detection Interval :	5 💌 seconds		
🛛 Recording Time :	3 🕶		
🛩 Sending File Type :	JPEG 🔽

		Maximum file size is 100.	

Click 'Apply' to save settings and make the new settings take effect.

2.3.2 Motion Region

You can define the motion detection region within the image that camera captures, so this camera will ignore motions which are not covered by the motion region setting, and reduce the chances of false alarm.

Item	Description
Region 1 – 3	Check the box to enable motion detection region 1 to 3.
	You can check multiple boxes to enable multiple motion
	detection regions. When you checked a box, a new
	region (and region number) will be displayed on captured
	image.

Sensitivity	Move the slide bar to change the motion detection
	sensitivity setting: Drag the slide to the right to increase
	sensitivity (camera will detect minor changes in the
	image), and drag the slide to the left to decrease
	sensitivity (camera will only detect major changes in the
	image).
Refresh	In case the objects of the image captured by the camera
	moved, click this button to reload the image captured by
	camera, so you can decide the motion detection region
	more precisely.
Save	Save motion detection region settings.

To change the motion detection region, you can 'resize' and 'reposition' it:

Move the mouse cursor to the eight dots located at the border of motion detection region, and the mouse cursor will switch to \leftarrow , , or \ddagger , or \ddagger . You can click and hold mouse button and move the mouse to resize the motion detection region.

To move reposition the motion detection region, move the mouse within the motion detection region, and the mouse cursor will switch to . Click and hold mouse button and move the mouse to reposition the motion detection region.

You can define the destination address of E-mail sending and mail server parameters here.

E-Mail	
🛩 Recipient E-Mail Address :	
🛩 E-Mail Subject :	Motion Detection Notification
♥ SMTP Server:	
🛩 Sender E-Mail Address :	
🛩 SMTP Port:	25
♥ SMTP enable SSLv2/v3 function :	🔿 Enable 💿 Disable
SMTP Authentication :	🔿 Enable 💿 Disable
🛩 User Name :	
🛩 Password :	
	Apply Send a test email

Item	Description	
Recipient E-Mail	Input the email recipient's Email address here.	
Address		
E-Mail Subject	Specify the title of sending email, so you can identify the	
	mail sent from this camera from others quickly.	
SMTP Server	Input the IP address or host name of the SMTP server	
	(the server that delivers the Email for you) here.	
	If you don't know, please refer to the SMTP server you're	
	using in your Email software (like Outlook, Outlook	
	Express etc.), or ask your network administrator or ISP.	
Sender E-Mail	Input the Email address of mail sender, this will help you	
Address	to identify the Email sent by this Network Camera by	
	sender's Email address.	
	NOTE: Some mail server would reject to deliver the	
	Email from unknown sender, it's recommended to input	
	your own Email address here, or any other actual one.	
SMTP	Some SMTP server requires mail senders to be	
Authentication	authenticated before they can send Email. If your SMTP	

	server requires you to do so, please select 'Enable', or	
	select 'Disable' to disable it. If you don't know, please	
	refer to the SMTP server you're using in your Email	
	software (like Outlook, Outlook Express etc.), or ask your	
	network administrator or ISP.	
User Name	Please input the user name of SMTP server here, if your	
	SMTP server requires the use of authentication.	
Password	Please input the password of SMTP server here, if your	
	SMTP server requires the use of authentication.	

Click 'Apply' to save settings and make the new settings take effect.

After that, you can click 'Send a test email' to send a testing Email to the address you set here, so you can make sure the setting you specified here is correct and working.

2.3.4 FTP Configuration

You can set FTP server's parameters here.

FTP Configuration	
✓ FTP Server :	
🛩 FTP Port :	21
🛩 User Name :	
🛩 Password :	
💘 Remote Folder :	
💘 Passive Mode :	💿 Enable 🔘 Disable
	Apply Upload a test file

Item	Description
FTP Server	Input the IP address or host name of the FTP server you
	wish to use here.
FTP Port	Input the port number of the FTP server you wish to use
	here.
User Name	Input the user name of the FTP server you wish to use
	here.
Password	Input the password of the FTP server you wish to use
	here.
Remote Folder	Input the remote folder name on the FTP server here. If
	nothing is specified here, all uploaded image files will be
	placed in FTP server's root directory.
	Please ask FTP server's administrator to know which
	folder you should use. Certain user name may have
	restrictions and therefore can not place the file in the
	directory not owned by the user.
Passive Mode	Select 'Enable' to use passive mode to send file, or select
	'Disable' to not to use passive mode to send file.
	Some FTP servers require passive mode, if you don't
	know, please ask FTP server's administrator; most of
	FTP servers will work fine with both modes, but if you

found that non-passive mode is not working, you can try
to use passive mode.

Click 'Apply' to save settings and make the new settings take effect.

After that, you can click 'Upload a test file' to send a file to the FTP server you set here, so you can make sure the setting you specified here is correct and working.

2.3.5 SD Card Configuration

You can define the filename and destination folder when saving a file in SD card.

SD Card Configuration

- Enable Cycle Recording
- 💘 File Name Prefix :

Destination Folder :

Motion	
record	
Apply	

The descriptions of every setting in this menu will be given below:

Item	Description	
Enable Cycle	Check this box and this camera will automatically erase	
Recording	oldest image file to make rooms for new image files when	
	SD card is full. If you don't want to lose old image files, do	
	not check this box.	
File Name Prefix	Specify the filename prefix (the texts which will be added	
	before the file sequence number).	
Destination	Specify the folder name that camera will store the saved	
Folder	image or video clip.	

Click 'Apply' to save settings and make the new settings take effect.

2.4 System Info

You can use this menu to get the operational information of this camera:

After you selected 'System Info.', a sub-menu will appear. There are 4 sub-menus available here:

Detailed descriptions of every setting will be given below.

2.4.1 Camera Information

Camera information allows you to set the name and administrator's password of this camera.

Camera Information	
🛩 Camera Name :	IC-5010PTn
🛩 Password :	••••
🛩 Confirm Password :	••••
Apply	

The descriptions of every setting in this menu will be given below:

Item	Description
Camera Name	Please specify the name of this Network Camera here. This can be used to identify your camera on the network when you have more than one Network Camera in the same network.
	Default name begins with 'IC-' plus the last 6 characters of the MAC address of this Network Camera. You can modify the name to the one you can remember and meaningful to you, but never give all Network Cameras in the same network with same name.
Password	Please specify user name 'admin' 's password here. (The one you need when you log onto web management interface and use 'admin' as user name.
Confirm	Please input the same password again, to make sure
Password	there's no typo.

Click 'Apply' to save settings and make the new settings take effect.

2.4.2 Date / Time Setting

This setting allows you to change the date and time of the real time clock in this Network Camera. You can set the time manually, or use network time protocol (NTP) to set the time automatically.

Date / Time Setting	
◯ Set Date/Time manually	
NTP Server	
🖤 Time Zone :	(GMT+08:00) Taipei 🛛 🗸
✓ NTP Server :	pool.ntp.org
👻 Daylight Saving Time :	🔿 Yes 💿 No
Apply Synchronize to PC time	

Item	Description
Set Date/Time	If you select 'Set Date/Time manually', you can set the
manually / NTP	date and time of this camera manually. Please input the
Server	date and time you wish to set here.
	Date / time format is YYYY / MM / DD HH:MM:SS
	Time is in 24-hour format.
	You can click 'Synchronize to PC time' to use the time of
	the computer you're using.
	Example: 24 th August 2007 = 2007/08 / 24,
	and PM 9:24:30 = 21:24:30
	If you called 'NTP Server' the comore will get the date
	If you select 'NTP Server', the camera will get the date
T	and time from NTP Server automatically.
Time Zone	Please select the time zone of the country / city of
	resident from dropdown menu here.
NTP Server	Please input the IP address or host name of NTP server
	here. You can use default value 'pool.ntp.org', or ask your
	ISP for the IP address or host name, if they have one.
Daylight Saving	If your area of residence uses daylight saving, select

Time	'Yes'; otherwise select 'No'.
Synchronize to	Click to input current time of your computer to 'Set Date /
PC time	Time manually' field.

Click 'Apply' to save settings and make the new settings take effect.

If you wish to use the date and time setting of the computer which is connecting to the camera, click 'Synchronize to PC time' button. The date and time setting of the computer will be filled to date and time setting in this page.

2.4.3 Schedule

You can use this menu to setup Schedule Snapshot/Recording settings:

Schedule Snapshot	Apply
🛩 Enable FTP Schedule :	🔿 Enable 💿 Disable
🛩 Time Interval :	🔿 Upload one image to FTP server every 🚹 hour(s) 📝 /Frame
	Opload one image to FTP server every 2 Frames per Second
🛩 File Control :	O Upload files with filename composed of date / time
	Overwrite file with the same filename : snapshot .jpg
❤ Enable E-Mail Schedule : ❤ Time Interval :	C Enable O Disable Send one image every hour(s)
Schedule Recording	Apply
💘 Enable Schedule Recording :	🔿 Enable 💿 Disable
🛩 Time Interval :	Send one recording file every 0 minute(s)
🛩 Recording Time :	10 seconds (from 1 second to 10 seconds)
Send Recording File to FTP :	O Enable 💿 Disable
💘 File Control :	Opload files with filename composed of date / time
	Overwrite file with the same filename : record .avi
✓ Send Recording File to E-Mail :	C Enable 💿 Disable

Item	Description
Enable FTP Select 'Enable' to send the Schedule Snapshot to the	
Schedule appointed FTP server, or select 'Disable' to disable this	
	function. You have to configure FTP server parameters in
	'FTP Configuration' menu first, so this function will take
	effect.

Time Interval	You can choose to upload one image to FTP server
	according to the time interval you wish, or choose to
	upload image as you wish to FTP server every second.
File Control	This option allows you to choose to upload each
	schedule snapshot with different file name composed of
	date/time, or to choose to upload the schedule snapshot
	with the same file name you wish. If you choose the
	latter, the prior-saved schedule snapshot will be
	overwritten by the latest schedule snapshot.
Enable E-Mail	Select 'Enable' to send the Schedule Snapshot to the
Schedule	appointed e-mail address, or select' Disable' to disable
	this function. You have to configure e-mail settings in
	'Email' menu first, so this function will take effect.
Time Interval	This option allows the network camera to send one
	image according to the time interval you wish.
Enable Schedule	Select 'Enable' to enable schedule recording, or select
Recording	'Disable' to disable this function.
Time Interval	This option allows the network camera to send one
	recording file according to the time interval you wish.
Recording Time	This option allows you to adjust the recoding time based
	on your preference.
	Note: The available recording time is based on the video
	resolution and video frame rate settings in 'Video' menu.
Send Recording	Select 'Enable' to send the recoded video to the
File to FTP	appointed FTP server, or select' Disable' to disable this
	function. You have to configure FTP server parameters in
	'email & FTP' menu first, so this function will take effect.
File Control	This option allows you to choose to upload each
	recorded video with different file name composed of
	date/time, or to choose to upload the recorded video with
	the same file name you wish. If you choose the latter, the
	prior-saved recorded video will be overwritten by the
	latest recorded video.
Send Recording	Select 'Enable' to send the recorded video to the
File to E-Mail	appointed e-mail address, or select' Disable' to disable
	this function. You have to configure e-mail settings in
	'email & FTP' menu first, so this function will take effect.

2.4.4 Utilities

This menu allows you to upgrade firmware, clear all settings, reboot the Network Camera, and switch LED lights on/off.

Utilities

- 💘 Upgrade Firmware : 🛛
- 💘 Reset To Factory Defaults :
- 🛛 Reboot Device :
- ✓ LED Setting :

	Browse	Upgrade
Reset		
Reboot		
Turn off LED light		

Item	Description
Upgrade	If you downloaded latest firmware file from our website,
Firmware	you can click 'Browse' button to pick a firmware file
	located on your computer's hard drive and you can
	upload the firmware file to the Network Camera later.
	After you selected a proper firmware file from your
	computer, click 'Upgrade Firmware' button to start
	upgrade. DO NOT DISCONNECT NOW!
	If the firmware file you provided is invalid of you didn't
	provide the firmware file, you'll be prompted to select
	another valid firmware file again.
	The Network Camera will reboot after the upgrade procedure is done. PLEASE NOTE THAT THE IP ADDRESS OF THE CAMERA WILL RESET TO
	DEFAULT VALUE: 192.168.2.3
Reset to Factory	Clear all settings in the camera. Please think again
Defaults	before you do this, and then click this button to reset all
	settings.
	NOTE: IP address will be reset to default value
	'192.168.2.3' also. You'll need to change the IP address

	setting of your computer if the IP address of your computer does not begin with '192.168.2', and subnet mask is not '255.255.255.0', or you'll not be able to connect to this Network Camera again.
Reboot Device	If you found the Network Camera is responding slowly or behaves strange, you can click this button to try to reboot the Network Camera, this may help.
LED Setting	Click 'Turn off LED light' button to switch the LED light of this Network Camera off, so all LEDs on the Network Camera will stop working, in case you don't want other people know the camera is transferring data. You can click this button again to switch LED lights on again.

Click 'Apply' to save settings and make the new settings take effect.

2.4.5 Status

This menu provides all information about this Network Camera, like firmware version, system uptime, date / time, and network information.

System	
✓ Firmware Version :	v1.0 (Apr 28 2010 10:20:19)
Device Uptime :	16 min 13 sec
💘 System Time :	2010/01/01 08:15:59
LAN	
V IP Address :	192.168.2.3
🛩 Subnet Mask :	255.255.255.0

2.5 Account

If you wish to allow other people to view the live image captured by this camera, but don't want to allow them to modify system settings, you can give them user-level user name and password, so they can only view the image and can not change any system setting.

This camera supports up to 16 users.

After you selected 'Account', you'll be prompted to input user account information:

	Account
🛩 User List :	user1 : operator
♥ Login :	
🛛 Password :	
👻 Confirm password	
🛩 Authority :	 Operator O Guest Add Modify Remove

The descriptions of every setting in this menu will be given below:

Item	Description
User List	Lists all users currently available.
Login	Input the login name (user name) of this account.
Password	Input the password of this user here.
Confirm	Input the password of this user here again for
password	confirmation.
Authority	Select the privilege of this user: Operator (able to change
	system settings) or Guest (View images only).
Add	Click this button to add the account.
Modify	Modify an existing user's information. You have to select
	a user from user list first.
Remove	Remove an existing user. You have to select a user from
	user list first.

Click 'Apply' to save settings and make the new settings take effect.

Please note: only one user (including administrator) will be able to view the image of Network Camera at the same time.

2.6 SDHC

. . .

Camera 🗸 Video 🗸 Network 🗸 Motion Detection 🗸 System 🗸 Account 🗸 SDHC

After you selected 'System Info.', a sub-menu will appear. There are 4 sub-menus available here:

Status	Space Alarm	File Management	
			71

Please click the SD card setting you wish to set then refer to instructions given below:

2.6.1 Status

Here shows the remaining card space for you.

Status		
🛩 Total Space :	3979776 KB	
🛩 Used Space :	1414944 KB	
💘 Free Space :	2564832 KB	
	64%	

2.6.2 Space Alarm

When you're using SD card to store captured image and video clip, you can have this camera to send an E-mail to you when there's only little remaining space left on SD card.

Space Alarm

🛩 Recipient E-Mail Address :	
🛩 E-Mail Subject :	[SD Card Space Alarm]

The descriptions of every setting in this menu will be given below:

Item	Description	
FirstPage	Jump to first page of file list.	
PrevPage	Jump to previous page of file list.	
NextPage	lump to next page of file list.	
LastPage	Jump to last page of file list.	
SelectAll	Select all files in this page.	
ClearAll	Clear all files in this page.	
Delete	Delete selected files.	

Chapter III: Using Surveillance Software

3-1 Installing Network Camera Surveillance Software

The Network Camera surveillance software provides various functions like video recording, after this software is installed, you can use your Network Camera to safeguard your property. Please follow the following instructions to install the surveillance software.

1. Double click the setup file located in 'xxx' folder in supplied CD-ROM, when the following window appears, click 'Next'.

2. You can specify the destination folder of software installation, you can just use the default folder, and click 'Next' to continue.

🔂 Setup - IPCam Surveillance Software
Select Destination Location Where should IPCam Surveillance Software be installed?
Setup will install IPCam Surveillance Software into the following folder.
To continue, click Next. If you would like to select a different folder, click Browse.
C:\Program Files\IPCam Surveillance Software 3.0 Browse Browse
At least 11.4 MB of free disk space is required.
< <u>B</u> ack <u>N</u> ext > Cancel

3. If you need installation program to create a desktop icon or a quick launch icon for you, click all items you need here, than click 'Next' to continue.

🖟 Setup - IPCam Surveillance Software	
Select Additional Tasks Which additional tasks should be performed?	
Select the additional tasks you would like Setup to perform while installing IPCam Surveillance Software, then click Next. Additional icons: Create a <u>desktop icon</u> Create a <u>Q</u> uick Launch icon	
< <u>B</u> ack <u>N</u> ext >	Cancel

4. Here lists all options you chose in previous steps, if everything's correct, click 'Install' to start installing procedure, or click 'Back' to go back to previous step to modify installing settings.

🕼 Setup - IPCam Surveillance Software	
Ready to Install Setup is now ready to begin installing IPCam Surveillance Software on your computer.	
Click Install to continue with the installation, or click Back if you want to review or change any settings.	
Destination location: C:\Program Files\IPCam Surveillance Software 3.0	
Additional tasks: Additional icons: Create a desktop icon	
< <u>B</u> ack Install	Cancel

5. The installing procedure will take some time, please be patient.

6. When you see this window, it means the software installing procedure is complete. Please click 'Finish' to finish the procedure (Network Camera surveillance software will start after you click 'Finish' button, if you want to start it later, uncheck 'Launch IPCam Surveillance Software' box).

3-2 Using Network Camera surveillance software

You can click 'IPCam Surveillance Software' icon from desktop, quick launch bar, or start menu to start the Network Camera surveillance software.

You can put the mouse cursor on a certain component and see its button name, and here're detailed descriptions of all buttons:

Item	Description
Video displaying	The image of all connected cameras will be displayed
area	here.
Language	Select a language from this dropdown menu to change
	display language.
Display layout	Change camera image display layout (Click a layout icon
E	to change camera display layout). There are 8 kinds of
	available display layouts.
Full screen	Click this button to switch to full screen mode (only
	display all camera's image), press 'ESC' key to quit full
	screen mode.
Scan	Click this button and the Network Camera surveillance
0	software will switch displaying the image of all connected
	camera automatically. Click this button once to activate
	scan function (scan icon will become blue 🎑), click
	again to stop scanning (scan icon will become white 12).
Zoom out	Zoom-out (To see more objects).
\odot	This function is only available for supported cameras.
Zoom In	Zoom-in (Too see more details).
\odot	This function is only available for supported cameras.
PTZ control	There are 8 directions in PTZ control ring. If the camera
	you connect support PTZ, you can use PTZ control ring
() () () () () () () () () ()	to change the direction that camera points to.
	This function is only available for supported cameras.
Home	Click this button to return the camera to 'Home' (default)
6	position.
	This function is only available for supported cameras.
Recording	Start video recording.
-	
Configure	Software / camera configuration.
-	

Playback	Playback a recorded video file.
Snapshot	Take a snapshot of current camera.
Ō	
Message display	Displays all system messages like camera is
	disconnected etc.
Close window	Terminates Network Camera surveillance software.
(stop	
surveillance)	
Minimize window	Minimizes Network Camera surveillance software
Θ	window.
Video displaying	Displays the image of all cameras by the display layout
area	you selected.

3-3 Configure Network Camera surveillance software

3-3-1 Configure cameras

Before you use this Network Camera surveillance software, you must configure the camera(s) you wish to connect. Please click 'System configure' button and a popup menu will appear:

Configure Cameras General Options

Please select 'Configure Cameras' to configure cameras:

3-3-1-1 'Camera' tab

In this tab you can configure all cameras you wish to connect. Up to 16 cameras can be connected simultaneously:

Configure Cameras				X
Channel	Camera Schedule R	ecording Audio Motion Recordir	Ig	
Channel 1 Channel 2 Channel 3 Channel 4 Channel 5 Channel 6 Channel 7	 Edimax PnV DDNS Free Manual 	Camera ID Password	Camera ID Password	
Channel 8 Channel 9 Channel 10 Channel 11 Channel 12 Channel 13 Channel 15 Channel 15 Channel 16	Camera Configurat Name IP Address Web Port Video Format	IC-7110W 192.168.4.60 80 MJPEG	Model Username Password	Edimax_IC7110W admin **** Reset
	Camera Search Camera Name IC-BD486C	IP 192.168.4.6	Model 0 Edimax_IC7110W	
			Select	OK Cancel

Item	Description	
Channel	Select the channel number you wish to set.	
Camera Search	All cameras found on your local network will be displayed	
	in 'Camera Search' box.	
Select	Select a camera listed in 'Camera Search' box, and click	
	'Select' button to fill all parameters of selected camera in	
	every camera configuration fields.	
Refresh	Rescan all cameras on your local network. If you didn't	
	see the camera you expected in 'Camera Search' box, or	
	new cameras has been joined to your local network after	
	last scan.	
Name*	Input the name of camera here. Default value is the first 6	
	bytes of camera's MAC address, you can change the	

name of camera so you can remember the camera's	
location of purpose easily.	
Displays the model of selected camera, this field can not	
be changed.	
Input the IP address of camera.	
Input the user name of camera.	
Input the web port of the camera. By default it's '80'.	
Input the password of camera. Default value is '1234'.	
You should change the password if you changed the	
password of selected camera.	
Select the video encoding format of this camera (MJPEG	
or MPEG4).	
Clear all fields in 'Camera Configuration' section.	
Save settings in this tab.	
Discard all settings in this tab.	

*: It's recommended to use 'Select' button to fill the content of this field.

**: Only available for cameras support this function.

After you've set all channels you wish to set, click 'OK' to save settings, and if everything's correct, you'll see the camera's image in Network Camera surveillance software's main menu:

3-3-1-2 Schedule Recording

In this tab, you can setup scheduled video recording, so you can record the video captured by all cameras you have by a pre-defined schedule.

annel 2 annel 3	One Time Schedules
annel 4 annel 5 annel 6 annel 7 annel 8 annel 9 annel 10 annel 11	2009/07/10 11:03:27 - 2009/7/10 11:10:27

Cycle Recording	Disable 🗸
	確定 取消

Item	Description			
Data Directory	Set the directory (folder) you wish to store the recorded			
	video and captured image. You can click 'Browse' button			
	to pick a directory in your hard disk.			
Free Recording	Displays remaining storage space.			
Space				
Max Video File	Defines the maximum file size of every video file. When			
Size	the size of file exceeds this value, Network Camera			
	surveillance software will open another file to record the			

	video.			
Scan Time	Define the time period to pause between every camera			
	switch when you activate 'Scan' function.			
Cycle Recording	You can decide the behavior when hard disk space is full:			
	Disable: Do not overwrite recorded video files.			
	Enable: Overwrite recorded video files.			
ОК	Save settings in this tab.			
Cancel	Discard all settings in this tab.			

3-3-2-2 'E-Mail Setting' tab

If you want to use motion detection function and wish to get an email that contains the image captured by the camera, please setup your email related parameters here first.

General Options			X
General E-Mail Setting Security About			
E-Mail Subject Recipient E-Mail Address			
New Edit Sender E-Mail Address		Delete	
SMTP Server			
SMTP Port	25		
SMTP Auth	🔘 Enable	Oisable	
SMTP Account			
SMTP Password			
		確定	取消

Item	Description			
E-Mail Subject	Specify the subject of sending email.			
Recipient E-Mail	Here lists all email addresses you set.			
Address				
New	Click this button and you'll be prompted to input the email			
	address. Click 'OK' to save changes.			
	Mail Address			
	OK Cancel			

Edit	Select an email address from 'Recipient E-Mail Address'
	box, and click 'Edit' to edit the email address.
Delete	Delete selected email address.
Sender E-Mail	Specify the email address of email sender.
Address	
SMTP Server	Specify the IP address or host name of the SMTP server
	you wish to use. For most of ISPs they will only allow its
	subscriber to use their SMTP server, if you don't know
	which SMTP server you should use, please refer to the
	setting of your email software or ask your ISP / network
	administrator.
SMTP port	Specify the port number of the SMTP server you wish to
	use here. By default (and the setting of most of SMTP
	servers) it's '25'.
SMTP Auth	Select 'Enable' if your SMTP server requires
	authentication, select 'Disable' if it's not required. If you
	don't know if your SMTP server requires authentication,
	please refer to the setting of your email software or ask
	your ISP / network administrator.
SMTP Account	Input the SMTP account (username) of your SMTP
	server here. In most cases, it's the same with your POP3
	username (the one you used to receive email). Please
	refer to the setting of your email software or ask your ISP
	/ network administrator if you're not sure about this.
SMTP Password	Input the SMTP password of your SMTP server here. In
	most cases, it's the same with your POP3 password (the
	one you used to receive email). Please refer to the
	setting of your email software or ask your ISP / network
	administrator if you're not sure about this.
ОК	Save settings in this tab.
Cancel	Discard all settings in this tab.

3-3-2-3 Security

If you don't want other people to access this Network Camera surveillance software, you can set a password to protect it.

You'll need to input the password every time you wish to use this Network Camera surveillance software:

Authentication required	
Please input password	
Password:	
OK Cancel	

To set password, please use 'Security' tab in 'General Options' menu:

General (Options						X
General	E-Mail Setting	Security	About				
Se	curity						
	🔘 Enable		💿 Disa	ble			
	Password						
	Confirm Passw	ord					
						確定	取消

Here are the descriptions of all setting items:

Item	Description
Enable	Requires password authentication when this software
	starts.
Disable	Password authentication is not required when this
	software starts.

Confirm	Input the password you wish to use here again.
Password	

3-3-2-4 About

This tab shows the version number of the Network Camera surveillance software you're using.

General Options	X
General E-Mail Setting Security About	
IP Camera Surveillance Software Information	
Version: v3.0.4.6	

3-4 Change Display Layout

This Network Camera surveillance software provides 8 kinds of display layout:

Every layout displays different number of camera and camera arrangement, you can click the icon that presents a specific kind of layout, and the video displaying area will change accordingly.

Layout style 1: 1 Camera only	Displays the video of 1 camera only.
Layout style 2: 4	Displays the video of up to 4 cameras.
Cameras	

Layout style 3: 6	Displays the video of up to 6 cameras.
Cameras	
	Displays the video of up to 9 compares
Layout style 4: 8 Cameras	Displays the video of up to 8 cameras.
Layout style 5: 9 Cameras	Displays the video of up to 9 cameras.
Layout style 6:	Displays the video of up to 10 cameras.
10 Cameras	

Layout style 7: 13	Displays the video of up to 13 cameras.
Cameras	
Layout style 8: 16	Displays the video of up to 16 cameras.
Cameras	

3-5 Full-screen mode

If you want to use all available spaces on your monitor to display surveillance image, you can click 'Full Screen' button to switch display mode to full-screen mode.

To exit full-screen mode, press 'ESC' key.

3-6 Scan

If you have more than one camera configured, and you wish to switch the displaying image between cameras, you can click 'Scan' button to switch between all configured cameras.

NOTE: If a camera is configured but disconnected, it will still be displayed in a scan sequence (you'll see nothing and you'll see 'Disconnected' text displayed at the upper-left corner of display image).

Click 'Scan' button once to activate scan function (scan icon will become blue), click again to stop scanning (scan icon will become white).

3-7 Zoom-in / Zoom-out

For cameras that support zoom-in / zoom-out function, you can use this function to see more objects that fall in the scope of camera's view, or enlarge the image size of a certain object to see its detail.

Please select a camera in video displaying area by clicking on its image, then click button to see more objects that fall in the scope of camera's view, or click to enlarge the image size of a certain object to see its detail (Before zoom-in, you may need to use PTZ buttons - described in next section) to find an object you wish to see its detail). For cameras that support pan - tilt function (but this model doesn't support PTZ function), you can change the position that camera points to, to see different places that fall in the scope of camera's view.

Please select a camera in video displaying area by clicking on its image, and then click the directions you wish the camera to move to (total 8 directions available). Click 'Home' button () to return to camera's home (default) position.

3-9 Snapshot

You can take a snapshot of selected camera and save it to 'Snapshot' sub-folder of pre-defined data directory.

Click snapshot button once to take a snapshot; you can take as much snapshot as you want before hard disk is full.

3-10 Recording

You can start video recording of selected camera manually by clicking 'Start Recording' button:

When recording starts, you'll see a message displayed in message displaying box like '1/1 10:00:00, Camera 2 Start Manual', which means camera 1 starts recording manually on 1/1 at 10:00:00.

To stop recording, click 'Start Recording' button again, and you'll see a message displayed in message displaying box like '1/1 10:00:00, Camera 2 Stop Manual'.

3-11 Video Playback

You can playback all recorded video by clicking this button.

A new window will appear:

Time Sea From				Channel	File Name	
From	5/ 1/2008 💌	12:00:00 PM		1	Manual_2008-5-20_12-0-13.avi Manual_2008-5-20_12-5-9.avi

		-		1	Schedule_2008-5-20_11-50-58.avi Schedule 2008-5-20 11-52-13.avi	
Motion 9	5earch			102	200105055000000005500550000000000000000	
From	5/ 1/2008 💌	12:00:00 PM				
То	5/30/2008 💌	12:00:00 PM	Search			
				Play		

You have to search the video file before you can play it. There are two kinds of video search: Time Search (search all videos file that falls in a specific period of time) and Motion Search (search all videos recorded by motion detection function and falls in a specific period of time).

Please define the start and end date / time of the time period you wish to search, and then click 'Search' button (of 'Time Search' of 'Motion' Search'). All found videos will be displayed, select the video you wish to play and click 'Play' button to playback.

Chapter IV: How to Access the Network Camera Remotely with iPhone & Android Phones

IC-3100 series features smart phone support for iPhone users and Android phone users to monitor their home using Edimax Network-Cameras.

Please check following instruction for installation. The following instruction applies to all Edimax routers

Step1:

Ensure My-PC is Internet-ready via Router

Step 2:

Check with your ISP (Internet Service Provider) whether a Public and fixed IP address is assigned to you. An IP address is like an unique phone number that is totally different from all the others' for calling a particular person. You could browse the Internet or monitor your home over the Internet with iPhone by using this unique IP address. Therefore, an unique IP address is a Public and fixed IP address. With this, it's much easy for iPhone monitoring your home. For example, an IP address looks like numbers separated with a dot as: 192.168.2.3

(1) Fixed and public IP address:

All IP addresses different from the following are fixed and public IP address 10.0.0.0 - 10.255.255.255 172.16.0.0 - 172.31.255.255 192.168.0.0 - 192.168.255.255 Write down this IP address and go to Step 3. In this guide, we use a hypothetic IP address, 61.61.61.1 (yours is different)

(2) Dynamic IP address

If your ISP service staff cannot tell you what IP address is for you, you can still monitor your home with iPhone, but it turns more complicated. Your IP address for browsing Internet will change by hours or by days. Over 90% chance, you may get a dynamic IP address. There is a solution called Dynamic DNS (DDNS) for free. With this, you could register a name like http://my-name.dyndns.org for example to find out Edimax network camera in the I-Phone. To apply for this, refer to the Appendix "How to apply for a free DNS account in the http://www.dyndns.org " In this guide, we assume you have already got http://my-name.dyndns.org. (yours may vary) and go to Step 3.

Step 3:

Configure the 1st Camera based on the following:

Configure the 2nd Camera based on the following:

Configure the Broadband Router based on the following:

Quick Setup	General Setup	EZ View	Status	Tools	
Home / General	Setup / Advanced Se	ettings / NA	T / Virtual	Server

4.1 iPhone App Installation

(1) Please download 'Ediview' application from Apple's Appstore

(2) You can launch EdiView by clicking 'EdiView' icon. You'll see welcome screen and please wait for few seconds

(3) When you launch EdiView, it will attempt to connect to existing configured network cameras. Please make sure you're connected to wireless access

point if your Edimax network camera is located on your local area network.

If you want search for network cameras on your local area network, or you want to add an Ediamx network camera on Internet, please click 'Cameras' button to abort and setup network camera manually

(4) To view more than 4 network camera's live image on your iPhone, click ubton on upper-left corner, and you can view up to 12 network camera's live image at the same time

You can click this button repeatedly to switch 1 camera / 4 cameras / 12 cameras view.

(5) You can manage network cameras in 'Cameras' list. To add a new network camera, click 'Add New Camera'.

Edit	Cam	eras	
Camera	is		
IC-BD3	C08		
	Add New	Camera	
	00	\odot	3/
Live	Events	Мар	Cameras

(6) EdiView will search for network camera on your local area network, and list all network cameras found here.

To add an network camera manually or add an network camera on Internet, click 'Add Camera Manually' button. (7) In this page, you can input network camera's parameters manually

Camera Type: Switch operating mode between Cloud and IP. In cloud mode you have to input Cloud ID**; In IP mode you have to input IP address or host name of network camera.

Camera Name: You can define a name for this network camera to help you to remember the purpose / location of this network camera.

IP: Input network camera's IP address or host name.

Port: Input network camera's port number, generally it's '80'.

User Name: Input the user name of network camera. Default user name is 'admin'

Password: Input the password of network camera. Default user name is '1234'

(8) You can also setup video parameters of this network camera.

Brightness: Select video brightness (1 to 5, darkest to brightest).

Saturation: Select video saturation (1 to 5, lowest to highest).

Sharpness: Select video sharpness (1 to 5, lowest to highest).

Video Quality: (Highest to Lowest, select a lower video quality will help when network speed is slow).

Tilt Speed: Select camera pan & tilt movement speed. Click 'Done' to save changes

(9) To delete an existing IP camera, click 'Edit' button. Click Solution of the IP camera you wish to delete

(10) Click 'Delete' button to delete IP camera

(11) Now you can back to 'Live' menu, if you see a snapshot appear, it indicates the network camera is correctly configured.

Click snapshot picture to enlarge video view

(12) If network camera you connected supports pan/tilt control, you can click the button on the upper-right corner to switch to 'Gesture' mode and use your finger to slide on the live image view, and network camera will move as your finger slides

A white arrow will also appear to indicate the direction of camera movement.

Please note: If the button appears on upper-right corner shows 'Switch', you can't move camera.

(13) To view events (motions detected by network camera), click 'Events) button below in network camera's live view

	Eve	ents	
IC-BD3	C08		>
	<u> </u>		24
	Evente		

All network cameras will be listed and you can choose one to see its events list.

(14) All events of selected network camera will be listed here. You can click an event to see enlarged photo.

Events	IC-BD3C08 C
	2011/1/1 8:01:51
BIRFUN	2011/1/1 8:01:59
	2011/1/1 8:02:22
SIG FUN	2011/1/1 8:02:27
	2011/1/1 8:02:41

(15) Event's snapshot and event date / time will be displayed. Click the button with network camera's name (upper-left corner) to go back.

(16) You can use this function to mark your network camera on Google map, so you can locate them and remember their physical location easily.

Please note that you need active Internet connection to show map on your iPhone. Click 'Map' button at the bottom of your iPhone to access Map menu.

(17) Google map will be shown on your iPhone, and it will attempt to locate your current location by GPS and network.

If you're using your iPhone indoor, your iPhone may fail to locate your location. You can still use your finger to drag the map and find your current location manually.

If the network camera you're about to mark on the map does not locate at your current location, you can also use your finger to drag the map and find the location where your network camera is installed.

A red pin indicating the location of network camera will be placed at the center of map.

(18) When you found the location where network camera is installed, click 'Locate' button located at upper-right corner of your iPhone, and a camera list will be shown

Select the network camera you wish to mark on the map, and click 'Done' when done.

4.2 Android App installation

(1) To install Ediview application, launch 'Market'. (In your Android device's 'All apps' menu)

(2) Click magnifier icon at upper-right corner of Android market, and input 'Ediview' in search field

(3) You should able able to find Ediview utility (If not, please check spelling), and click 'Download' to download and install Ediview

(4) Android will prompt you to confirm installation, please click 'Install' button below to start installation

(5) Please be patient while EdiView is being installed.

(6) When EdiView utility is successfully installed, you'll see this message. Click 'Open' to launch EdiView utility now, or click 'Complete' to launch EdiView utility later

(7) You can launch EdiView by clicking 'EdiView' icon in 'All Applications

(8) When you launch EdiView, it will search for all Edimax network cameras on your network. Please make sure you're connected to wireless access point if your Edimax network camera is located on your local area network.

If you want to add a Ediamx network camera on Internet, please click 'Manually' button to abort and setup network camera manually

(9) In this page, you can input network camera's parameters manually Name: You can define a name for this network camera to help you to remember the purpose / location of this network camera

Cloud / IP Mode Switch: Click this button to switch operating mode between Cloud and IP. In cloud mode you have to input Cloud ID**; In IP mode you have to input IP address or host name of network camera

User Name: Input the user name of network camera. Default user name is 'admin'

Password: Input the password of network camera. Default user name is '1234'

Click 'Add' to add a new network camera with parameters listed above.

(10) When an network camera has been added successfully, you'll see it appear in EdiView utility's camera list

Please repeat last step to add more network cameras you wish to connect. To repeat last step, press 'Menu' key on your Android device and click 'Add' button

(11) If the network camera is connected, you'll see a picture appear. Click the Picture to view live image

To configure network camera's parameters, click 🖤 icon

(12) When you click an network camera in camera list, you'll see its live image Like this. You can hold your Android device horizontally to enlarge network camera's live image view.

If the network camera you connected supports Pan & Tilt, you can click

button and use your finger to slide on the live image to the direction you wish to move.

(13) To take a snapshot of current live image and save it on your Android device, click statement button. You'll see 'Save Snapshot' message appear, which indicates a snapshot has been taken.

(14) If you have more than 1 network cameras, you can click 🔳 button and

you can see the image of up to 4 network cameras at the same time; Click on the camera's image to enlarge it

You can also click 🗰 button to see up to 12 network cameras at the same time.

(15) To configure the video display parameters of this network camera, clickbutton, and you can drag the slide bar to configure parameters:

Brightness: Configure video brightness

Saturation: Configure video saturation.

Sharpness: Configure video sharpness.

Video Quality: Configure video quality by setting a lower (left) or higher (right) image quality. When network speed is slow, using a lower video quality will help.

Pan & Tilt speed: configure the camera moving speed when you use pan / tilt function

Click 'Done' button when you finish, or click 'Cancel' to abort. You'll see the result after you click Done'.

(16) When a new event (movement) has been detected by network camera, you'll see 🕥 icon appear in network camera list. You can click it to see events.

(17) All events will be displayed here, with the time which triggered this event. Click on the event to see enlarged picture

(18) The image of this event will be displayed with the time triggered this event. To see enlarged picture, hold your Android device horizontally

(19) To save a snapshot of this event, click **•** button. You'll see 'Saved event image successfully' message to prompt you that image has been saved successfully.

(20) When you're in camera list, press 'Menu' button on your Android device. A menu will appear on the bottom of EdiView utility.

See live images of network cameras

Map Use google map to locate network cameras

Add Add a new network camera

Refresh Reload network camera list

(21) You can use this function to mark your network camera on Google map, so you can locate them and remember their physical location easily. Please note that you need active Internet connection to show map on your Android device.

Click 'Map' button at the bottom of your Android device to access Map menu

(22) Google map will be shown on your Android device, and it will attempt to locate your current location by GPS and network

If you're using your Android device indoor, your A may fail to locate your location. You can still use your finger to drag the map and find your current location manually.

If the network camera you're about to mark on the map does not locate at your current location, you can also use your finger to drag the map and find the location where your network camera is installed

A blue pin indicating the location of network camera will be placed at the center of map.

(23) When you found the location where network camera is installed, press 'Menu' button on your Android device and click 'Locate' button and a camera list will be shown. Select the network camera you wish to mark on the map.

4.3 Web browser installation

Please make sure your web browser supports JAVA first. If your web browser does not support JAVA, you can install JAVA from website: <u>www.java.com</u> and get JAVA software.

(If your web browser does not support JAVA, you'll see this message when you try to use JAVA browser)

Java Applet is not Supported by your Browser. Please visit http://www.java.com/ to download.

(1) If you're not login Windows as system administrator, please use system administrator to launch Internet Explorer. To do so, right-click Internet Explorer icon and click 'Run as administrator'.

NOTE: You must use 32-bit Internet Explorer!

(2) Input the following web address in your web browser's address bar: "XXXXXXXXXXXXXXX.myedimax.com".

Address	001F1FBD3C08.myedimax.com
	Search for "001F1FBD3C08.myedimax.com"

(3) If you see this message, click 'Run' to continue

5.2 How to apply for a free DNS account at http://www.no-ip.com

It's very likely your IP address (the Internet location) keeps changing every a couple of hours or every day depending on your ISP's policy. Therefore, as shown in the following figure, you may be assigned with an IP address, "61.61.61.1" hours ago, and now with a new IP address, "72.72.72.1". This means the router at "My-home" can be found at http://61.61.61.1 over the Internet is no longer available after a few hours. To find out the new location (IP address) of the router at My home over the Internet, you need to login to the router, checking the new IP address. However, this is not a workable solution.

To overcome this problem, an Internet service called NO-IP DNS is designed to help you trace the log of the changing IP address linking with a web site address (URL). As shown in the following figure, one PC called DNS server keeps revising the record "your-name.no-ip.org vs 61.61.61.1" in its internal DNS directory. It ends up entering http://your-name.no-ip.org in the iPhone can find out the 2 network camera at My-home.

The following are steps to apply for an account named "your-name.no-ip.org" in the http://www.no-ip.com and how this account is configured into Edimax router.

Note: http://www.no-ip.com is not a branch or affiliate of Edimax. No commercial relation is involved between these 2 companies. The related service offered in the http://www.no-ip.com is for free for a specific time. However, Edimax does not guarantee this service.

First, go to <u>http://www.no-ip.com</u> and apply for an account.

And follow the steps:

If you would like a more MX records, please upgrade to <u>No-IP Plus</u> or <u>Enhanced</u>.

Now, you could locate your home network camera using http://your-name.no-ip.org

Create Host

Revert

5.3 Troubleshooting

If the network camera is not working properly, before you contact the dealer of purchase for help, please check the troubleshooting list here, this may help you to solve the problem by yourself and therefore saves your valuable time.

Scenario	Possible Solution
I can not connect to	a. Please confirm the IP address setting of the
network camera	computer you're using. If they're not in the same
	subnet, they will not be able to communicate with
	each other.
	b. Please make the IP address you used to connect to
	the network camera is correct.
	c. If you forget the IP address of the network camera,
	you will have to reset it to factory default value (which
	is 192.168.2.3) by pressing 'reset' button at the
	bottom of the network camera. You'll need a pen or
	pin to be able to press the reset button. Press and
	hold reset button for 5 seconds, then try to connect to
	the network camera with IP address '192.168.2.3'
	again.
	d. Please make sure network camera is correctly
	powered (the 'Power' LED should be on).
	e. If you're trying to connect to the network camera
	from Internet, please make sure the port that network
	camera uses (Video and HTTP port, see section
	2.3.1) is not blocked by firewall or other software /
	hardware.
	f. Contact dealer of purchase for help, if above
	solutions do not work.
Image refreshes	a. Try a higher frame rate setting, if it's not 30.
very slow	
	b. Try a lower resolution.

	c. If you're connecting this camera from Internet, it could be caused by a slow Internet connection, and it's not a problem caused by camera. However, when the network connection is slow, you should use lower frame rate / resolution.
	d. Adjust the antenna if you're using wireless connection. The antenna should be perpendicular to the ground to get best reception, and the distance between network camera and computer / wireless access point should not be too far.
	e. Try to adjust 'MTU' setting if you're using PPPoE to connect to Internet. Ask your ISP or network administrator for detailed instruction.
Network camera is	a. Is the network cable or wireless connection
not responding	disconnected? Please check it.
	b. Unplug the power adapter from wall socket and
	plug it in again after 10 seconds, then try to connect to the network camera again.
	c. If network camera is correctly powered ('Power'
	LED is on), but you still can not connect to the camera when you're sure that IP address is correct, please
Image is fuzzy	contact dealer of purchase for help).a. Adjust the focus ring on the camera until the image
	becomes clear.
	b. Use a soft cloth to clean the lens on the camera.
	You can use cloth with water, but DO NOT use
	alcohol or other chemical solution.
	c. Try to adjust brightness setting.
	d. If there's any light at the place where network

	camera is located, switch it on and see if image looks better.
I set the network camera to send image by Email or	a. If the image is send by Email, please make sure it's not blocked by any anti-spam mechanism.
FTP, but nothing is received	b. Please make sure you have enough permission for FTP uploading (You can try this by clicking 'Upload a test file' button).
	c. Make sure the user name and / or password of SMTP server is correct, if your SMTP server requires authentication (You can try this by click 'Send a test Email' button).
	d. Please check log, if FTP upload or Email sending is failed, it will be logged, and this may give you some clue on how to solve the problem.
	e. Change the threshold to a more sensitive setting.
I heard strange sound when I use pan / tilt function	a. Please check if anything jams the camera, remove it.
	a. If the camera does not respond to you when you're trying to use pan / tilt function, the servo motor inside the camera may dead. Please return the camera to the dealer of purchase and ask for help.
Nothing is heard at the camera side	An external speaker is required to playback the voice received at computer side.
when I use 'Speak to IPCam' function
